

Reindeer Hide Care Instructions

Your reindeer hide will look beautiful indoors and out. It will last for many, many years. In the beginning it will molt quite heavily. It is recommended that you take it outside and shake it every 2-3 days. After 1 month, it will settle down and you can shake it less often.

You can use your reindeer hide indoors or outside. It is not damaged by rain, so long as it is allowed to dry out after getting wet.

Do not keep your rug in front of a fireplace. Excessive heat or drying will cause the hairs to shed. It is recommended that you leave your rug outside for at least one day in every month.

Do not allow cats to attack your rug, they love to dig out the hairs with their claws!

Thank you.

Enjoy your rug !
